GOOD PLAN

The most profitable plan for operating in stocks is that of uniting capital of various sums by combining or pooling the orders of thousands of customers and using them as the orders of thousands of customers and using them as one mighty whole, which has been done so successfully by Messrs. Lawrence & Co., Bankers, 57 Exchange Place, New York City. By this co-operative system each investor is placed on an equal footing with the largest operator, and profits are divided pro rata among stockholders every 30 days. An investment of \$10 would pay \$50, making 5 per cent, on the stock during the month. \$25 would return \$150, or 6 per cent.; \$100 would make \$1,000, or 10 per cent., and so on, according to the market. Frank Leslie's Illustrated Newspaper, June 29th, says: "The Combination method of operating in stocks is the most successful ever adopted." New York Independent, September 12th, says: "The combination system is founded upon correct business principles, and no person need be without an insays: "The combination system is founded upon correct business principles, and no person need be without an in-come while it is kept working by Messrs.
